

My greatest benefit thus far from satellite radio is the instant traffic reports I hear. I live north of the Houston area which means every time I drive into Houston, which is all the time, I am faced with the potential of hitting terrific traffic jams. Now that XM carries instant traffic reports, I keep up to date on the roads condition and know which route to take into Houston. It is a tremendous feature. Please reject the NAB's petition of 04-160 which will deny my dependence on satellite radio's instant traffic reports. If you would like to contact me, please do so.
